

PARTICIPANT INFORMATION SHEET

STUDY TITLE

Tension Prediction in Non-Tonal Music: A Comparative Study

INVITATION PARAGRAPH

You are being invited to take part in a research study. Before you decide whether or not to take part, it is important for you to understand why the research is being done and what it will involve. Please take time to read the following information carefully.

WHAT IS THE PURPOSE OF THE STUDY?

The purpose of this study is to examine the perceived tension certain types of music generates in listeners in order to inquire about the validity of the state-of-the-art algorithms and models that predict perceived tension.

WHY HAVE I BEEN INVITED TO PARTICIPATE?

You have been invited to take part in this study through email calls for participation to relevant parties and mailing lists, and you have indicated an interest in participating together with the other 29 participants. You reported to known problem with your hearing levels and an interest in music.

DO I HAVE TO TAKE PART?

It is up to you to decide whether or not to take part. If you do decide to take part you will be given this information sheet to keep and be asked to sign a consent form. If you decide to take part you are still free to withdraw at any time and without giving a reason.

To withdraw consent during the study, notify Aydin Kuru by e-mail at any time:

a.kuru@sussex.ac.uk.

WHAT WILL HAPPEN TO ME IF I TAKE PART?

You will be asked to continuously rate the tension you perceive while a musical repertoire is presented to you. To do this, you will enter the Pavlovia server running the experiment software and follow the steps as they presented to you. The steps of the experiment are as follows;

1. You will adjusted your headphone volume in accordance with the software.
2. You will be presented with the digital slider and the music where each piece will be listened to for a minute. You will be asked to move the digital slider one way to zero, implying a decrease tension, or the other way, implying an increase in tension. This will continue until the repertoire

is presented to you in full in random order, taking roughly 45 minutes together with the pauses between pieces.

WHAT ARE THE POSSIBLE DISADVANTAGES AND RISKS OF TAKING PART?

This study will not involve any activity that will pose a significant risk to you.

The time investment for the experiment is roughly 45 minutes.

WHAT ARE THE POSSIBLE BENEFITS OF TAKING PART?

The potential benefit is the experience of hearing a repertoire of music that is both fundamental for music theory and evolution and will probably be new to the participant.

WILL MY INFORMATION IN THIS STUDY BE KEPT CONFIDENTIAL?

All information that enables you to be identified ('personal data') will be not be inquired about. Information that is asked will be kept strictly confidential. Data protection legislation will apply to the processing of all personal data.

WHAT SHOULD I DO IF I WANT TO TAKE PART?

You will be asked to sign and return the consent form.

WHAT WILL HAPPEN TO THE RESULTS OF THE RESEARCH STUDY?

The results of the study will be used in future research publications and the researcher's doctoral thesis. To obtain a copy of the published research, the participants can contact a.kuru@sussex.ac.uk when the publications are underway in the coming years.

WHO IS ORGANISING AND FUNDING THE RESEARCH?

There are no external funders to this research that is taking place at the University of Sussex School of Media Arts and Humanities.

WHO HAS APPROVED THIS STUDY?

The research has been approved by the Social Sciences & Arts Cross-Schools Research Ethics Committee (C-REC) with ethical review application number ER/AK2086/1.

CONTACT FOR FURTHER INFORMATION

If you have any concerns relating to this project please contact Aydin Kuru (a.kuru@sussex.ac.uk) and Dr. Chris Kiefer (c.kiefer@sussex.ac.uk), or the Chair of the Social Sciences and Arts Cross Schools Research Ethics Committee (c-recss@sussex.ac.uk).

INSURANCE

The University of Sussex has insurance in place to cover its legal liabilities in respect of this study.

You will be given a copy of this Participant Information Sheet and the Consent Form to keep.

Thank you very much for taking part in this study!
